History. The historical roots of meta-analysis can be traced back to 17th century studies of astronomy, while a paper published in 1904 by the statistician Karl Pearson in the British Medical Journal which collated data from several studies of typhoid inoculation is seen as the first time a meta-analytic approach was used to aggregate the outcomes of multiple clinical studies.

Every year, thousands of papers are published that describe new algorithms to be applied to medical images. But very few provide a fair and direct comparison of the newly proposed algorithm with the state of the art. We believe that such comparisons can help to substantially improve the performance of medical image analysis algorithms. We support the organization of these events and the ...
